Pollution Solutions

Support real behaviour change in how people view the issues of littering and waste. Moreover, change the way businesses package and produce their goods for us as consumers.

The Tackling Plastic team at Keep Northern Ireland Beautiful have some advice and ideas that you could incorporate into your Small Grants Scheme application.

Community Growing

Grow your own community veg garden and encourage people to bring their own boxes to take away food. No more fruit and veg wrapped in plastic!

Repurpose

Think about giving old pallets a new lease of life and repurposing them into a wall garden – perfect for herbs or plants!

Revitalise

Revitalise old outside water taps and encourage local community to fill up their reusable water bottle whilst out and about – walking, running or cycling

Ditch the Disposables

Ditch the disposables for your community hall/group/sports club by replacing them with reusable alternatives like bamboo, crockery or reusable plastic.

Environmental Workshops

Deliver an Environmental Workshop for your community group - learn how to make your own beeswax wraps to reduce your community's use of plastic container.
